

CLEANING HEALTHY, SMART AND GREEN

TOP 10 REASONS UNGER IS GREEN

BETTER • CLEANER • EASIER

UNGER

Quality Tools for Smart Cleaning™

Top Ten Reasons Unger Is Green

1. Reduce Cross-Contamination

- Global color-code systems reduce the hazards of cross-contamination between high- and low-risk areas of buildings.
- Distinct color-coded tools, buckets and mops make it easy for cleaning workers to separate tools into their correct areas of use.

2. Green Restrooms

- The Unger Restroom Cleaning Systems include a variety of ergonomic tools, divided buckets and an icon-based training program designed to reinforce best practices for green cleaning.
- Tools are designed to clean for health and create a more productive work environment.

3. Microfiber Reduces Bacteria

- Studies have demonstrated that Microfiber technology reduces bacteria levels on surfaces by over 97 percent.
- The synthetic fiber construction improves absorbency and cleans better while conserving water during the cleaning process.

4. Longer Product Life Cycles

- Unger tools are made from the finest materials to ensure quality and extended use of the tool.
- Microfiber has a longer product life cycle, reducing disposal costs and outlasting natural fiber products 10:1.

5. Product Performance

- Unger cleaning tools and systems complement green chemical systems to enhance product performance and increase worker safety.

6. Water Conservation

- Unger cleaning systems, buckets and tools are designed to clean with less water and without the need for aggressive chemicals.

7. Reusable and Recyclable

- Cleaning tools with modular designs allow components to be replaced and reused. This avoids short product life cycles and unnecessary disposal.
- Unger tools are reusable and recyclable.

8. USGBC Member

- Unger is a member of the US Green Building Council. We support the LEED-EB standards. Unger cleaning systems and training tools contribute to the points available for building certification.

9. Best Practice & Processes

- Videos, wall charts and on-site training help cleaning organizations achieve better results at the lowest possible cost.

10. Commitment to the Environment

- We encourage sound public policy by taking a leadership role toward the environment. The success of healthy buildings depends on more than just products.
